

Inspector's Question 2 to the Council

The Documentation being Examined

The submitted document being examined is entitled the 'Submission Adur Local Plan 2016' (library reference CD07/1).

The Council has already proposed what it has described as 'Major Modifications Proposed to the Submission Adur Local Plan 2016' (CD07/4). However, these 'Major Modifications' have not been subject to public consultation.

Nevertheless it is clear to me that the Council considers these 'Major Modifications' to be necessary in order for the Plan to be sound. They reflect the Council's most up-to-date position. Therefore they will form part of the evidence on which the discussions at the hearing sessions will be based.

If, after I have read and heard all the evidence, I decide that these 'Major Modifications' (in their current form or altered if necessary) are required in order to ensure that the Plan is sound, then they will be published, along with any other changes that are required for soundness. The over-arching schedule of proposed significant changes will be called the 'Schedule of Main Modifications'.

Can the Council confirm that it is content with this approach?

David Hogger

Inspector

2nd December 2016
